HARITH DHARA PROJECT BY NILAX SHIRKE

SUSTAINABLE CITY DESIGN : REDEVELOPMENT

# Introduction

Dharavi, one of the largest informal settlements in the world, faces challenges in housing, sanitation, and infrastructure. Redeveloping Dharavi presents an opportunity to create a model of sustainable and inclusive urban transformation.

## Objective:

To transform Dharavi into a well-planned, sustainable, and inclusive urban space while preserving its cultural and entrepreneurial spirit.

## Key Focus Areas

- Better Living Conditions: Housing, sanitation, and public spaces
- Eco-Friendly Systems: Rainwater harvesting, renewable energy, smart waste management
- Boost Local Businesses: Infrastructure improvements without disrupting small businesses
- Inclusivity: Ensuring redevelopment benefits artisans, workers, and families

## Vision & Roadmap

Phase 1: Research & Community Engagement

Phase 2: Planning & Sustainable Infrastructure Design

Phase 3: Implementation with Minimal Displacement

Phase 4: Monitoring & Adaptive Changes

## Conclusion & Call to Action

This project aims to prove that urban redevelopment can be sustainable, people-focused, and a model for other high-density areas around the world. The next steps involve collaboration with stakeholders, refining plans, and implementing pilot projects to bring this vision to life.
